## HOW BIG ARE THEY?

## DID YOU KNOW?

### Roe deer:

- are native to the UK dating back to 10000BC
- have a prominent white rump in their winter coat
- are most likely to be seen at dawn and dusk
- make barking noises when alarmed

Neil McIntyre

Young (kids) born in May and June.

George Trebarski

Roe deer can often be seen 'lying up' or resting while they digest their food.
