

## THE DEER STALKING CERTIFICATE 1 GUIDANCE TO CANDIDATES

The Deer Stalking Certificate 1 assessments are a series of tests of knowledge and skill which must be passed before a Certificate can be granted. The assessments are conducted by a qualified Assessor often with a small team of invigilators.

To be awarded the Deer Stalking Certificate 1, you must demonstrate knowledge and skills in the following areas:

1. **Deer biology and ecology** - the life and reproductive cycles, habitat requirements and behaviour of the six species of wild deer.
2. **The law** - the legal basis for the use of firearms and the culling of wild deer.
3. **Stalking techniques and taking the shot** – a theoretical knowledge of the basis of stalking techniques, points of aim and the reaction of the deer to shot placement.
4. **Deer identification** - an ability to identify the six species of deer normally found in the wild in the UK, being able to distinguish between the male and female of each species in both summer and winter coat.
5. **Safety**- an ability to safely handle firearms and other tools and equipment in a simulated stalking environment. This includes the use of knives and extraction equipment where appropriate.
6. **Shooting** – an ability to shoot accurately and consistently in a simulated stalking environment.
7. **Trained Hunter** – knowledge of the inspection of carcasses and the legal requirements enabling an individual to supply venison for human consumption.

The assessments for the certificate are arranged as follows:

**Written Assessment** A multiple choice written paper with 50 questions drawn from the current DMQ question bank. Pass mark required 80%.

**Visual Assessment** Twenty projected photographs, each to be identified by species and sex. Pass mark required 80%.

**Safety Assessment** Oral questions based around scenarios in a simulated stalking environment. There are ten questions selected from the current DMQ question bank. The majority of the questions will be relevant to the local area. **All** questions must be answered correctly according to the criteria laid down in each question.

**Shooting Assessment** A rifle range based shooting assessment requiring the placement of 3 shots in a four inch circle at 100 yards, followed by a series of 6 shots at a simulated deer target in three positions, prone, sitting or kneeling, and standing.

**Large Game Competency Assessment** A multiple choice written paper with 40 questions drawn from the current DMQ question bank. Pass mark required 80%.

You are required to pass all five assessments before being awarded the DSC1 Certificate. Exemption from taking the Large Game assessment may be given to anyone providing proof of having previously gained an acceptable qualification covering this element.

If you have passed only some of the assessments you will be sent a referral form which will enable you to complete the remaining assessments at any other DMQ approved assessment day within the 3 year registration period.

If you have registered with an Assessment Centre it is not mandatory that you take all the assessments with that particular centre. You may take your assessments at any approved assessment day run by a DMQ Approved Assessment Centre within the registration period of 3 years. Once this 3 year period has lapsed you must re-register (your assessment centre will have details).
